

README

In this zip file you will find the following files:

- **Json guide for LCAbyg**: which is the json guide for LCAbyg version 5
- **gen_dk**: which contains all the IDs and names from GenDK (the library in LCAbyg)
- **import_example**: which is an example project such as case 1 (enfamiliehus eksempelbygning). The file contains a number of json files that the user can edit and add to. These json files can be used as templates for creating nodes and edges.

Before starting, you should unzip (extract) the import_example.zip file and locate it the LCAbyg 5 folde. When downloading LCAbyg you chose the location of the LCAbyg 5 folder. In the vast majority of the cases, the folder is located in C:\Program Files\SBi\LCAbyg 5 (64 bit) (5.1.0.2).
